PREMIUM COTTON MOPS

Premium cotton mops absorb more water than commercial (budget) mops, giving better results & having a longer life. By absorbing more water they leave less streaks on high gloss floors.
Not suitable for non-slip & rough surfaces or spreading polish.

COMMERCIAL (BUDGET) COTTON MOPS

Commercial cotton mops absorb water but not as much as the premium cotton mops. The price is about half of a premium cotton mop but so is the life. Tends to leave streaks on high polished floors. Suitable for normal household cleaning.

POLY COTTON MOPS

Poly cotton mops repel moisture. They are suitable for non-slip & rough surface floors & polish spreading. They glide over rough surfaces instead of catching like a cotton mop. They leave no lint behind after the first few uses.

ANTI-BACTERIAL COTTON MOPS

Anti-bacterial cotton mops are designed to inhibit growth of bacteria within the mop.

LOOPED END

Looped ends add longer life & better performance to wet mops.
Looped ends allow for an open more absorbent twist that does not lint, fray or unravel. Ideal when a facility wants to launder their wet mops.

TAIL BANDS

Tail bands improve coverage control. They enable the mop to cover a wider path saving time & labour. Tail bands prevent tangling & permit laundering.

WEIGHT

The weight of a mop head is calculated in grams & goes up in weight the longer the mop gets.

Floormaster Flat Hospital Launder Mops

Premium cotton mop head

Angle tail banding helps to prevent tangling

Looped ends prevent linting of mop head & makes mop machine washable

Needs special clamp fitting & ferrule for handle

Main Office: 27 Gwy Terrace, Balaklava SA 5461
